DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 6, the limitation recites as "having any of a head and axial shoulder..." is confusing.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Eriksson (US 3,705,469).

Eriksson teaches anchor insert and setting cone for a pre-cast concrete body comprising a tubular body 40, lifting device 22, a resilient elastomeric foam rubber or plastic filler piece 64 is adapted to be inserted into the slot beneath the lift rod 22 in order to exclude the entrance of concrete into the slot at the time the wet concrete is poured into the concrete forms (col. 4, lines 57-62), expansion means 50 comprises two

axial grooves or abutments for the rubber piece 64 interposed there between, traction means 44 comprises a screw 44 (figs. 1-5).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Eriksson (US 3,705,469).

Eriksson teaches anchor insert and setting cone for a pre-cast concrete body comprising a tubular body 40, lifting device 22, a resilient elastomeric foam rubber or plastic filler piece 64 is adapted to be inserted into the slot beneath the lift rod 22 in order to exclude the entrance of concrete into the slot at the time the wet concrete is poured into the concrete forms (col. 4, lines 57-62), expansion means 50 comprises two axial grooves or abutments for the rubber piece 64 interposed there between, traction means 44 comprises a screw 44 is engaging a threaded hole 42 (figs. 1-5). The screw 44 having a head 269, an axial shoulder 263 (figs. 10-11).

Eriksson does not teach expressly the abutments are formed by a first plate, a second plate, where the elastically deformable element interposed between. At the time of the invention, it would have been obvious to a person of ordinary skill in the art to use the groove having two opposed walls serve to interpose the elastically deformable element for radial expansion when the traction control such screw rotating forward to compress

it. Examiner takes Official Notice the fact that the groove for interposing the elastically deformable element in between having two separated walls is obvious functional equivalent as two plates of the abutments.

Allowable Subject Matter

7. Claims 7-16 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art fail to disclose or render obvious the claimed combination including a shaft is supported a sealing means, which having an elastically flexible disk as specifically set forth in the claims.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Annable (US 3,873,147), Tye (US 4,179,151), Wilner (US 4,068,878), Krawczyk (US 6,353,971) teach anchor structural elements.
